

NASCUG USERS GROUP MEETING CALL FOR CONTRIBUTIONS

The North American SystemC User's Group (NASCUG) accelerates the use of SystemC for both new and established users of the language by providing venues for user interaction such as the first two NASCUG meetings. Following the great success of the first two meetings, we are calling for contributions to the 3rd NASCUG meeting to be held at the same location as DAC 2005 (www.dac.com) in Anaheim, CA, USA

A central component of the half-day user's group meeting will be several 20 minute presentations discussing SystemC design experiences and techniques. SystemC users interested in presenting their work are encouraged to submit a title and a short abstract (half page) on-line at: <http://www.nascug.org/abstracts>. The focus of the meeting will be on SystemC design methodology and real-world user experiences.

TOPICS (include but are not restricted to)

- Architectural modeling with SystemC
- Transaction-Level Modeling
- Software co-design with SystemC
- Platform design using SystemC
- Verification techniques using SystemC
- Integrating SystemC into the Design Flow
- SystemC Tool Flows and Methodologies

The final contribution should be a PowerPoint or PDF slide presentation with duration of about 20 minutes.

IMPORTANT DATES

- **Abstract Deadline:** April 4, 2005
- **Notification:** April 25, 2005

PROGRAM CO-CHAIRS

Jack Donovan, ESLX, Inc., jackd@eslx.com
Sofiène Tahar, Concordia University, tahar@ece.concordia.ca
Greg Tumbush, Starkey Labs, greg_tumbush@starkey.com

SPONSORS

NASCUG is looking for sponsors to underwrite the cost of this meeting. If your company or organization is interested in being a sponsor, please email: jackd@eslx.com.
